## **Sprint Bioscience appoints Jessica Martinsson as acting CEO after CEO Anders Åberg announces his resignation**

**Sprint Bioscience AB (publ.) (Sprint Bioscience) today announced that the Board has appointed Jessica Martinsson as acting CEO. Jessica Martinsson, who has held the position of operational manager, succeeds Anders Åberg, who has chosen to leave his post after 10 years as CEO.**

Anders Åberg co-founded Sprint Bioscience and during his ten years as CEO has led the work of building an effective research and development organization that has been able to attract a number of international partners. In recent years, the company has established three license agreements with global pharmaceutical companies.

*“When we founded Sprint Bioscience, we had a clear vision of how, through a combination of efficient process development and pioneering technology, we could generate drug candidates for global pharmaceutical companies. The fact that we have been able to build up the company in such a short time and to out-license three projects shows that we can create long-term values for our customers and shareholders. After these 10 years as CEO, it is now time for me to have time for other things,”* says Anders Åberg, CEO of Sprint Bioscience.

The Board of Directors of Sprint Bioscience has appointed Jessica Martinsson as acting CEO. Jessica has held the position of operational manager and is co-founder of the company.

*“We thank Anders Åberg for all the fantastic work that has led to Sprint Bioscience becoming the high-quality company it is today. Jessica Martinsson has also played a significant role in the company's success since its inception, and she will now, together with a very competent management team, take responsibility for its continued development. The Board has initiated a structured process to appoint a permanent CEO,”* says Rune Nordlander, Chairman of Sprint Bioscience.

Anders Åberg leaves the position as CEO on June 11 and Jessica Martinsson will take up the position of acting CEO at that time. Anders Åberg retains his shareholding and will remain as senior adviser to the company but will not have an operational role.

### **About Sprint Bioscience AB (publ)**
